neutron generator, closed loop ion beam control system using microcomputer fibre optics *(Chinese)* 0−65757
NTT ISPBX, architecture and design 0−48528
NTT ISPBX, integrated optical loop network, development 0−46564
optoelectronic repeaters, remote monitoring and control, with and without interruption *(Czech)* 0−39480
Orsi Integral 2000 system, four level struct. for process automation *(Dutch)* 0−45374
packet switched WDMA MANs, media-access protocol 0−70400
passive bus for broadband CPN 0−70301
plastic optical fibre LAN, architecture and access mechanism for integrated voice/data services 0−57586
plastic optical fibre transmission links, passive components 0−41131
Poland and potential appl. in subscriber networks and LAN *(Polish)* 0−46645
power system distribution network SCADA system, optical fibre-based 0−39115
primary communication network and system interface, automated system for monitoring and control 0−43313
private networks, future trends 0−46635
railway private electronic crossing, development *(Japanese)* 0−50905
real-time driver information provision by changeable message signs 0−62464
SAFENET, LAN for US Navy mission critical systems 0−46682
Saint Joseph's University fibre optic LAN, development 0−54357
Sandia terminal switching network and fiber optic loop, operating experience 0−43368
SCRAMNet, shared common RAM network 0−70351
SONET, progress in standardization 0−57385
SONET add/drop multiplex equipment administration using the TIRKS provisioning system 0−72910
SONET end-to-end mgt. with object-oriented approach, architectural model 0−72909
SONET technology and appls., user perspective 0−70297
SONET/ATM-based optical customer premises network, design 0−70300
spacecraft fibre optic LAN technology requirements and standards 0−70375
spread spectrum CDMA system for LAN 0−70356
steel recycling plant, control and DP integration using Pyramid Integrators and Ethernet LANs 0−50773
submarine control system, ASIC-based using distributed multiprocessor architectures 0−59993
survivable fibre optic LANs for military appls. 0−64154

optical links continued
  synchronous versus asynchronous CDMA for fiber-optic LANs using optical signal processing 0−57585
  TMAP, unmanned telecontrolled vehicle for military combat 0−68909
  Trans Australian Railway Communications System 0−56188
  transistor control system with optical fibre link *(Polish)* 0−50577
  transmission/distribution network telecontrol using optical links, EPRI R&D work 0−62188
  TRW laser communication simulations using BOSS (Block-Oriented System Simulator) 0−72897
  Tsurumi-Ryokuchi-Line Subway, Osaka, electric and communication facilities *(Japanese)* 0−68680
  ultrawideband coherent optical LAN system architecture and capacity constraints 0−64177
  US Sprint look at global ISDN 0−46578
  waveguide interconnects for optical processing 0−46250
  wavelength division multiple access network for computer communication 0−70399
  wavelength division multiple access on a high-speed optical fibre LAN 0−57536
  wavelength routed optical networks in telecom. and computing appls. 0−46633
  WDM networks, principles and appls. 0−70269
  WDMA computer network role of coherent optical communication 0−64125
  LiNbO$_3$ Mach-Zehnder modulator for optical fibre communication system, transmission simulation 0−72908

optical logic
  ADC using optical logic and table look-up 0−40169
  array, logic gate free-space interconnections in optical digital computers 0−63713
  array logic, flexible processing scheme of structured data, parallel operation by spatial coding and 2D correlation 0−51402
  array logic, inference engine 0−69960
  arrays with regular free-space interconnects, fault avoidance 0−69976
  beam scanning binary logic 0−69593
  bipolar Hopfield neural network model, optical implementation, EX-NOR logic *(Korean)* 0−49517
  bistable systems and devices, applics. and developments, state-of-the-art 0−45919
  computers, speed increase using polychromatism 0−51404
  conference, Los Angeles, CA, USA (Jan. 1990) 0−69973
  conversion system: binary to decimal, and decimal to binary, optical tree channel selection 0−57140
  Dammann gratings fabrication, light spot array production by laser beam shaping, optical logic power supply appl. 0−40167
  development of optical computer and logic elements 0−40653
  digital adder and subtractor, parallel optical gates and ripple carry struct. 0−57127
  digital arithmetic processor, symbolic substitution by holographic matching filtering 0−57129
  digital neuron design, optimisation 0−69677
  digital optical computing, optoelectronic interconnects in VLSI 0−57137
  digital optical computing model and ccts. CAD 0−69981
  digital optical logic using optically switching directional couplers 0−56741
  digital optical processor prototype based on symmetric self-electro-optic devices 0−56744
  digital optics 0−40657
  digital processor, parallel arithmetic algorithms using symbolic substitution logic 0−51403
  exclusive-OR gate and set-reset flip-flop , ZnSe interference filter use 0−40168
  fast packet switching, optically-processed routing 0−57138
  fibre optic distributed array image processor, design, fabrication and performance 0−69974
  fibre optic logic elements, complexity of networks 0−69598
